SECTION 2

LIMITATIONS

2.1 GENERAL

This section provides the FAA Approved operating limitations, instrument markings, color coding and basic placards necessary for the safe operation of the airplane and its systems.

Limitations associated with those optional systems and equipment which require handbook supplements can be found in Section 9 (Supplements).

2.3 AIRSPEED LIMITATIONS

<tr>
<td>Never Exceed Speed (VNE) - Do not exceed this speed in any operation.</td>
<td>183</td>

<tr>
<td>Maximum Structural Cruising Speed (VNo) - Do not exceed this speed except in smooth air and then only with caution.</td>
<td>146</td>
<td>148</td>
</tr>
<tr>

CAUTION

Maneuvering speed decreases at lighter weight as the effects of aerodynamic forces become more pronounced. Linear interpolation may be used for intermediate gross weights. Maneuvering speed should not be exceeded while operating in rough air.
